**Scoring and conduct of events:**

It is planned to conduct a major component of this Championship utilizing electronic targetry. In the event that a shot has not been recorded by an electronic acoustic target, the competitor may be permitted to reshoot the unrecorded shot at the discretion of the Head Scorer.

The competitor will be given realisable time for each unrecorded round of the relay.

Where electronic acoustic targets are being used for scoring, the intended electronic target system for centrefire rifles at the Championships will be the Shotmarker system. It is the competitor's responsibility to ensure their rifle and ammunition combination has the required velocity to register on the target. This can be checked on practice day and if the rounds do not register then a manual target will be available. Electronic acoustic targets must not be used for scoring Rimfire or Black Powder Cartridge Target Rifle events

It is the responsibility of the competitor to ensure that they attend the Championships with sufficient ammunition to deal with this eventuality. Events may be re-scheduled at the discretion of the Organisers to deal with changing circumstances such as inclement weather, etc.
